<u>Uyezds</u>	<u>Felling</u>	<u>Transport</u>
Vyrumaa	31.6	16.6
Khar'yumaa	35.0	16.1
Khiyumaa	33.2	Has no plan
Tartumaa	29.6	11.2
Virumaa	15.4	10.4
Valgamaa	38.8	10.1
Yarvamaa	32.7	9.1
Saaremaa	16.9	8.9
Iykhvimaa	16.8	7.9
Vil'yandimaa	16.8	6.1
Pyarnumaa	15.7	5.5
Iygevamaa	24.0	4.9
Lyannemaa	28.2	4.3

The poor showing of the uyezds having the lowest production percentages is due to poor organization of work at their timber managements. For examples, utilization of available electric saws at Pyarnumaskiy Timber Management is so poor that only half of them are in use and these are operated with a low rate of productivity. At Vil'yandimaskiy Timber Management, work is not organized according to the brigade system. (4)

Fulfillment of the year plan has been reported by the following logging enterprises located throughout the USSR:

The Kirovskiy Timber Management was the first management of Segezhtumles Trust, Karelo-Finnish SSR, to fulfill the year plan for felling and transport of timber. The workers pledged to transport 33,000 cubic meters of timber above plan. (5)

The Shuysko-Vidanskiy Timber Management of Yuzhkareelles Trust, Karelo-Finnish SSR, fulfilled its year plan for timber transport on 11 December. This year the management gave the country 50,000 more cubic meters of timber than last year.

The Alozero Logging Point of Kem Timber Management of Sevkareelles Trust, Karelo-Finnish SSR, has fulfilled its year plan for timber felling. Timber transport has increased considerably.

The Avneporozhskiy Logging Point, also of Kem Timber Management, has fulfilled its year plan for both timber felling and transport. (6)

The Ruokasal'ma Logging Point of Ukhta Timber Management of Sevkareelles Trust, Karelo-Finnish SSR, fulfilled its year plan for timber felling on 15 November. More than 36,000 cubic meters had been felled on that date. The transport plan had been met 92 percent on the same date. (7)

The Smiltene Timber Management, Latvian SSR, has already met the year plan for timber felling by 114.5 percent. The amount of timber felled in excess of plan is 10,700 cubic meters, of which more than 5,000 cubic meters have been transported to the railroad line. (8)

The Borisov Timber Management of Minlesprom Trust, Belorussian SSR, fulfilled the year plan for felling and transport of timber on 5 November. (9)

The Lambalinskiy Timber Management, Armenian SSR, fulfilled its year plan for timber felling and transport on 29 November. (10)

The Sonskiy and Boroviyanskiy managements, leading West Siberian timber managements, have fulfilled their year plan for timber felling. (11).
